VENETIAN BLINDS

Cotton 63mm with White Tape

Offering both versatility and durability, our range of Fauxwood blinds are a popular and practical choice for interiors. Simulating the look of real wood, the venetian blinds are available in 7 easy-to-use colourways and 21 ambient tape options. Manufactured using composite materials, Fauxwood blinds are ideal for high moisture areas such as bathrooms and kitchens due to their increased moisture resistance and PVC properties. The durable blinds can withstand extended periods of wear and tear without breaking, fading or warping and offer a simple wipe clean finish.
